

Written on mirrors:

Inscriptions and Mirror Studies project

The authors: G. Đurđević, G. Ryles, K. T. Hoang, Chen Haotian

1. Introduction

Digital heritage studies, digital archaeology and museology are growing fields in academia and present new ideas, tools and ways for protection of cultural heritage in the digital era. International research student group named Mirror Studies (www.mirrorstudies.com) started in January 2019 is a big data project, and website application.

2. Project

Establishing mirror studies as interdisciplinary academic field based on big data accumulation from wide range of files and information as archaeological sites, museums, bibliography with scholars' information, digital models with tools, education and research materials about mirrors across variety of cultures, regions, areas, historical time and events.

3. Collection (open access and user friendly)

- Archaeological sites, museums
- Historical sources, scholars and bibliography

Historical sources

In this subpage is going to be a list of historical sources. Various historical written sources (in different languages with English translation) from first written sources to 19th century (narrative texts, reports, various files and documents, epigraphic texts, literature and many others) are in the database.

Original text

English text For if anyone hears the word but is not obedient to it, he is like a man who looks

- members organize IVMSC (International Virtual Mirror Studies Conference)

4. Conclusion

At the moment, the Mirror Studies do not have inscriptions in collection. Inscriptions are understood as part of mirrors and part of different sort of sources where are mirrors and mirror makers mentioned.

Future projects:

- Inscriptions as part written sources
- Images of inscriptions
- Geographical location and it will be set on the map.

Mirror Studies will integrate inscriptions as part of the project and epigraphists are very welcome to participate in data and future activities.
